

MTS CONFIGURATION

ENTER CATEGORIES TO RECONCILE FROM, SEPARATED BY A SPACE: Enter the categories to reconcile. Separate each category with a space.

PREFIX NUMERIC CART NUMBERS WITH 'ZM': With numeric cart numbers should they be preceded with 'ZM'.

PREFIX ###X CART NUMBERS WITH 'ZM': With a cart number that has three numeric values followed by an alpha character, should they be preceded with 'ZM'.

PREFIX A??? CART NUMBERS WITH "ZC" ? Turning this to (Y)es will instruct PL to preface (add before) any cart numbers scheduled that begin with an alpha character. If you have exceptions to this rule see the below line to list the exemptions.

PAD NUMERIC CART NUMBERS TO A LENGTH OF 4: Should Power-Link add Zero's to the end of cut numbers to bring them up to a length of four.

OUTPUT TYPE 'I' FOR 'IN', 'T' FOR 'TRF', 'P' FOR 'PROMPT': Which type of export file should Power-Link create. Typically 'I' when going straight to MTS and 'T' when going to Power-Merge.

AUDIO CATEGORY TO USE IF NONE OTHER GIVEN: Enter a default category to use when the event has none assigned.

RECONCILE EVENTS FROM MTS WITH A ZERO RUNTIME: If an event comes from the asplay report and it has zero length duration should we consider this event in reporting reconcile status. Typically 'N'.

EXECUTE AFTER FILE TRANSFER: A call to a batch file to be executed after final file transfer.

ENTER CART NUMBER EXEMPT FROM ZC PREFACE, SEPARATED BY A SPACE: This was for a user to list cart numbers (including use of wildcards) that are NOT to be prefaced with "ZC"

CATEGORY TRANSLATION : This is used in the event that you are using a traffic system that produces the category somewhere in it's output file. This would be used to change a found category to another specified category. Place the Category to be changed then a Colon, then the Category value to replace it with. To change all category finds of PRO to COM would be PRO:COM .
